Realtime Analytics to Understand your Customers Better

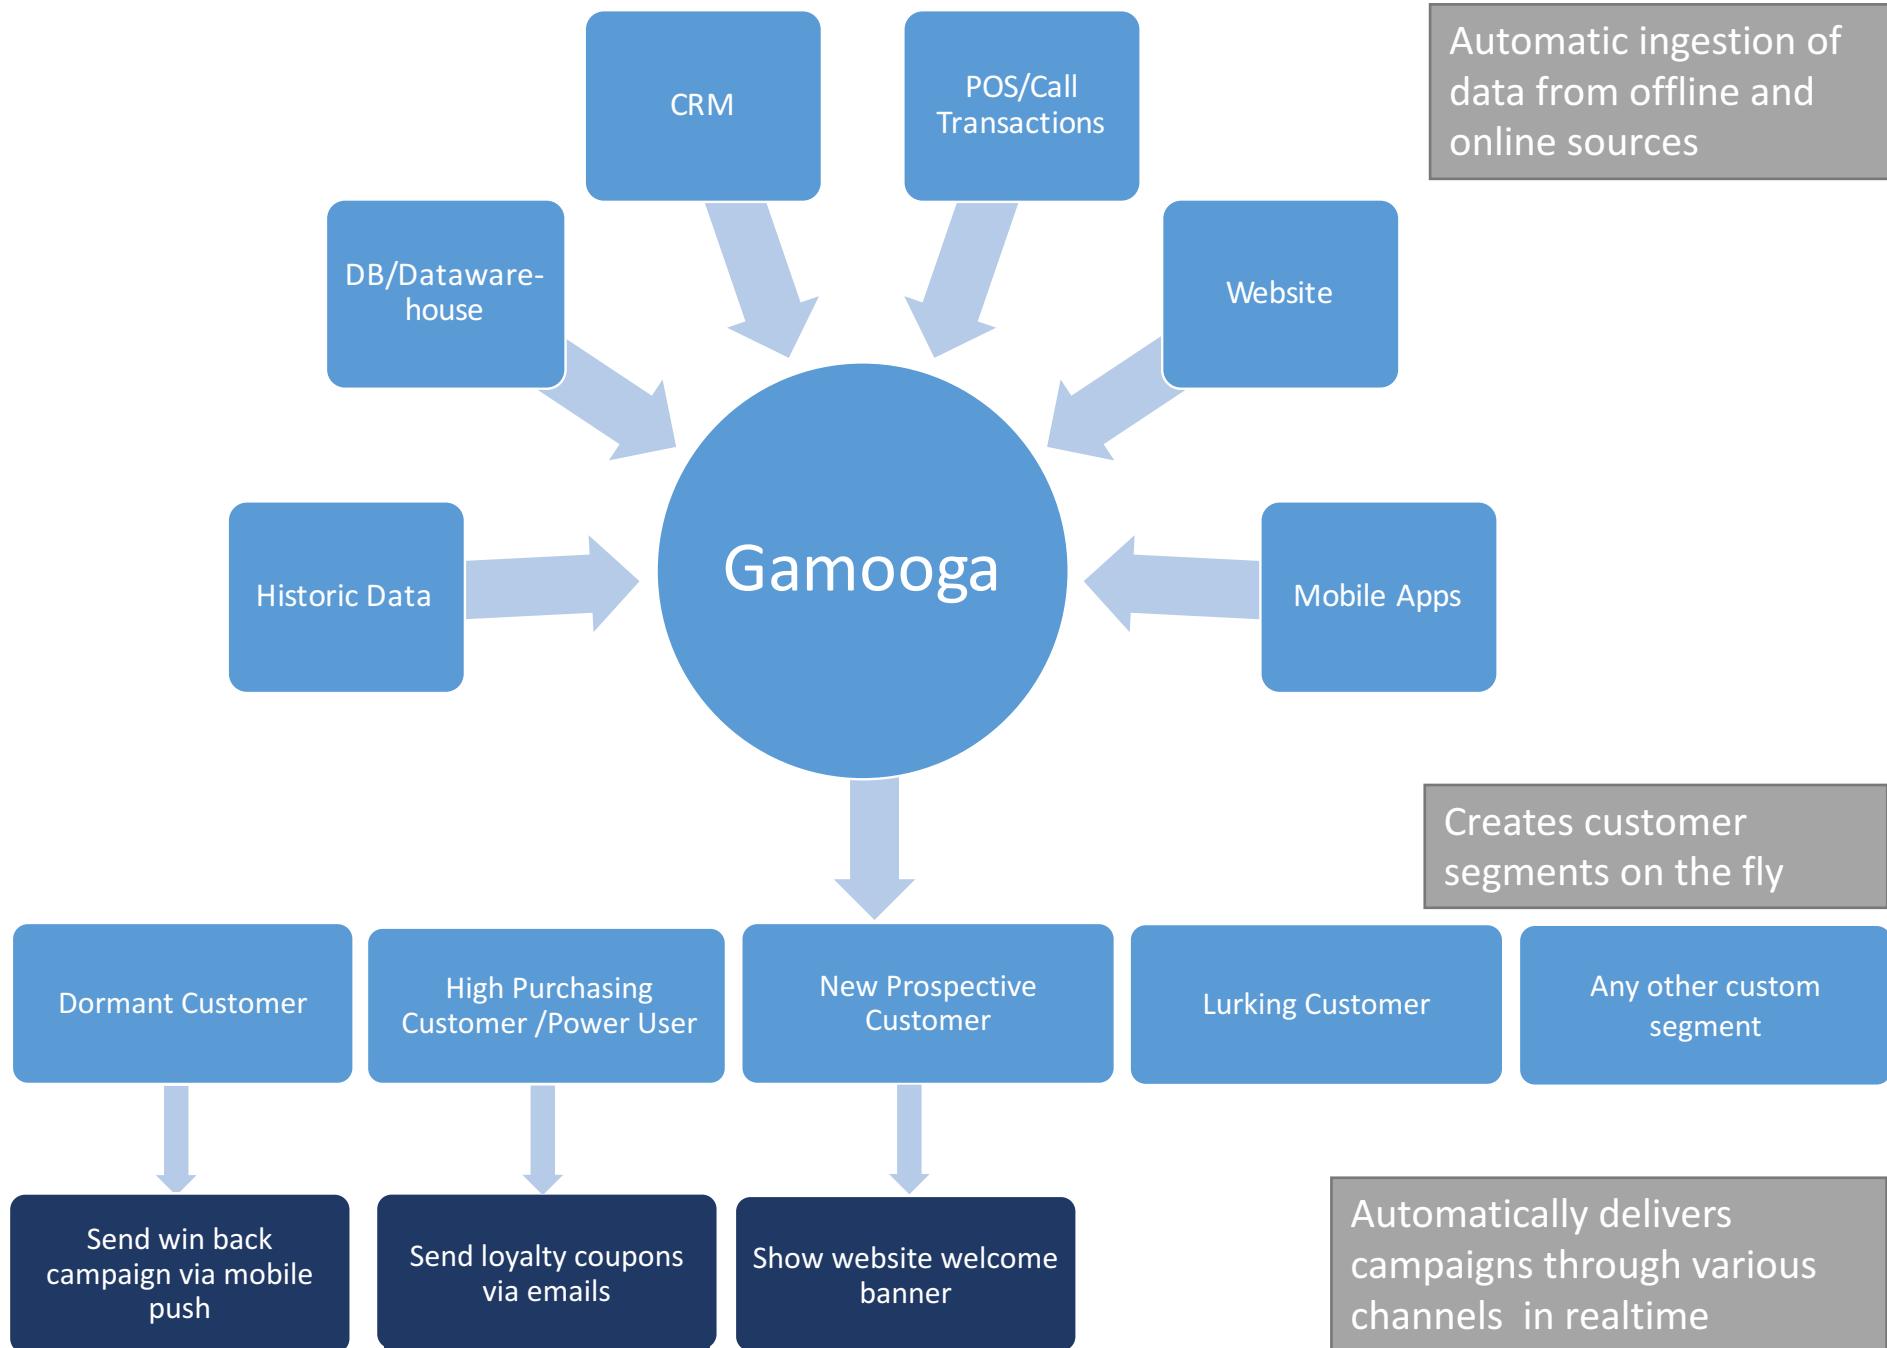

What does Gamooga help you with?

- Personalization – Brings more than 30% uplift in conversions.
- Improved brand loyalty with timely and relevant offers.
- Improved customer experience – Orchestrated messaging across all channels of interaction.
- Automation – Automate all your marketing campaigns with GUI based campaign journey builder. Set up the logic as a one-time activity and lie back.
- Eliminate IT dependency – Marketing team is empowered with a tool which helps them do ‘data driven marketing’ without having to depend on IT.

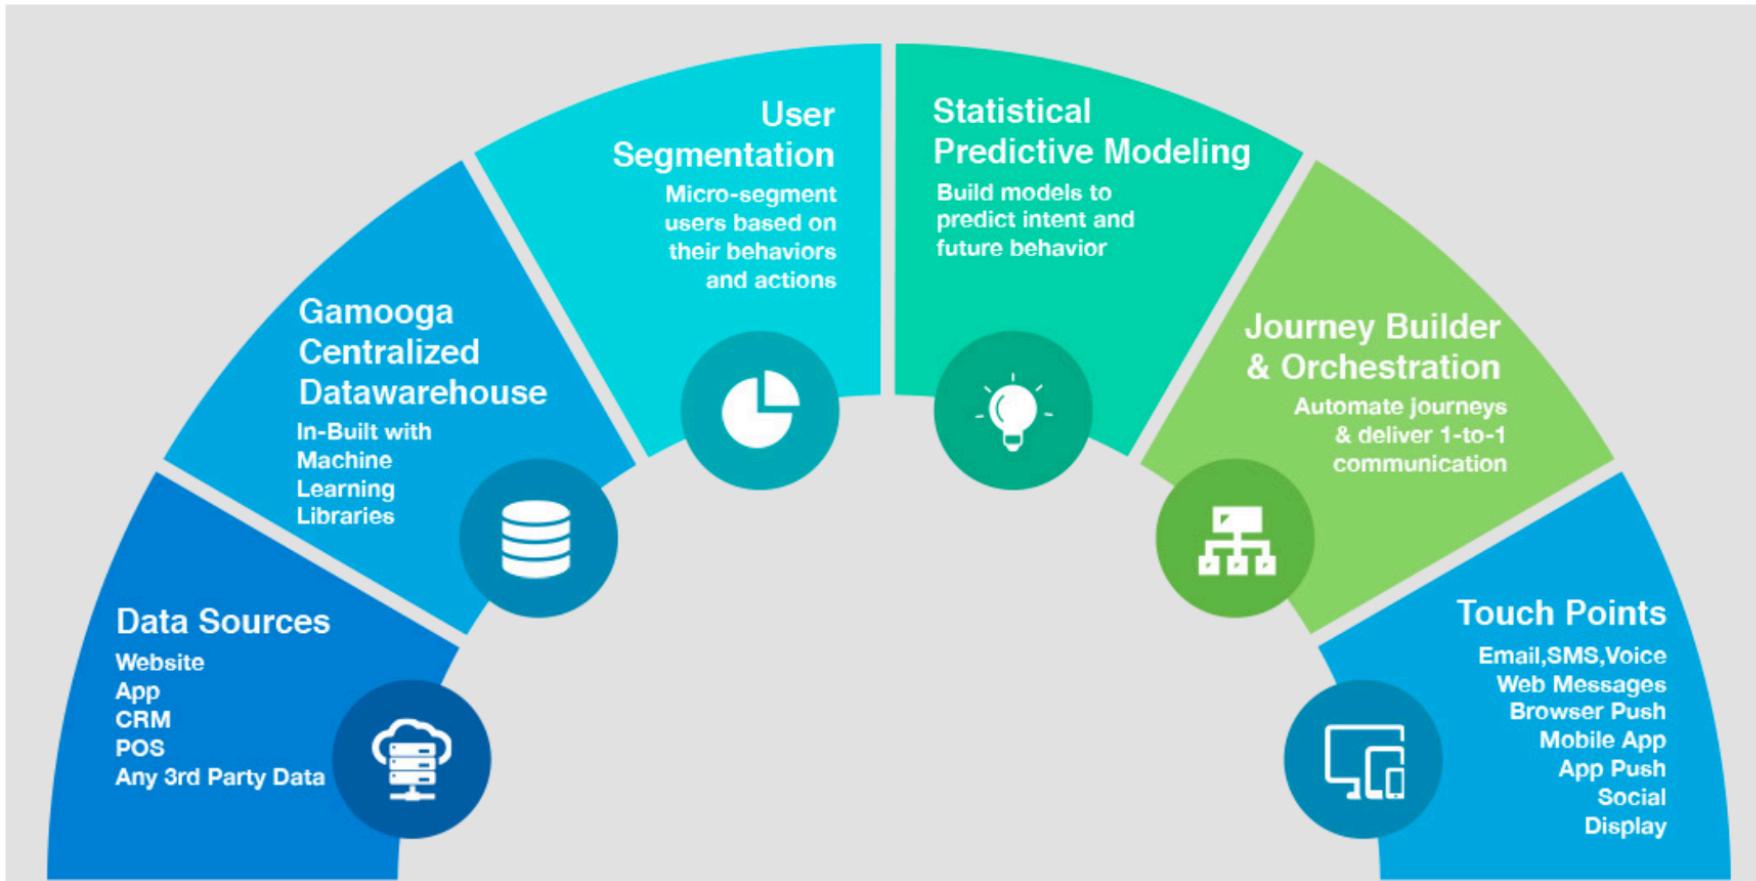

World's only truly Omni-Channel platform which tracks user behaviors across all platforms, devices and channels of interaction. Most of the marketing automation platforms are restricted to tracking Website and App behaviors only.

Marketing communication is never integrated when you work with multiple platforms for Email Marketing, SMS, Browser Push, Website Personalization and App Push thereby creating annoying customer experience.

Real-time. Orchestrated. Predictive

Create holistic customer views by ingesting and unifying data from offline and online sources.

Build powerful user segmentation.

Configure comprehensive workflows.

Orchestrate cross-channel campaigns.

Run high-yielding campaigns using Predictive Analytics.

Connect experiences across marketing, sales, service, and every customer touchpoint.

Website Personalization

Customize all the content shown to your customers while they are browsing your website based on their previous browsing history or their predicted category affinities.

Show dynamic recommendations like "Recently Viewed", "Top Sellers", "Customer who Viewed this also Viewed" etc

Create landing pages. Track visitor behavior, deliver customized web content and run A/B tests at various control groups in real time. Increase conversions, click-through rates, and order values.

Changing any element on the website is as simple as logging into Gamooga's admin panel, creating the content to be shown to the user, decide the placement within the page and building the logic.
